SUMMARY

Quantitative researcher skilled in designing and executing applied UX and survey research. Adept at adapting product and business questions into the right research methodology, applying statistical analysis to large and complex datasets, and communicating findings to technical and non-technical audiences. Demonstrated success managing end-to-end projects.

WORK EXPERIENCE

Quantitative Market Researcher

Sep 2024 – Present

Conjointly

Irvine, CA

- Conducted 15+ survey research projects for UX, consumer insights, and marketing teams, applying experimental design and statistical analysis to inform product decisions.
- Adapted client research questions into actionable methodologies including conjoint analysis, MaxDiff, and implicit testing, choosing appropriate approaches for each project.
- Led survey setup, data collection, and analysis using R, SPSS, SQL, Excel, and Power BI, including data cleaning, quota monitoring, and multivariate statistical analysis of datasets.
- Integrated external behavioral data (e.g., client-side user actions) into survey instruments via redirect logic and variable piping, linking observed behavior to self-reported responses.
- Communicated findings to technical and non-technical stakeholders, informing decisions on feature selection, pricing, audience segmentation, and marketing strategy.
- Served as subject matter expert on conjoint analysis and survey methodology, leading demo calls, client consultations, and webinars for 300+ platform users.

Research Assistant

Jun 2023 – Aug 2024

UCSB Department of Education

Santa Barbara, CA

- Administered surveys across 40+ science museums and conducted qualitative coding/analysis on follow-up interviews, applying statistical and qualitative methods to identify DEAL programming barriers by institution size, type, and region.

Research Intern

Sep 2023 – Jun 2024

UCSB Basic Needs

Santa Barbara, CA

- Owned analysis for a mixed-methods study on needs insecurity among AANHPI students; coded data, surfaced themes, and merged findings into stakeholder recommendations.

EDUCATION

University of California, Santa Barbara

Jun 2024

BS, Psychological and Brain Sciences | Minor in Applied Psychology

Santa Barbara, CA

- **Academic Research Project:** Designed and fielded a survey study on social identity theory and ingroup/outgroup threat; analyzed data in R and co-authored faculty-presented reports.

SKILLS & TOOLS

- **Research Methods:** Experimental design, hypothesis testing, statistical analysis, multivariate statistics, discrete choice experiments, regression, survey methodology, implicit testing, data visualization
- **Programming & Tools:** R, SPSS, SQL, Excel, Power BI, HTML, JavaScript
